

JOB POSTING

JA Tech Inc. is a provider of specialized construction & field technical services for most equipment & apparatus which form a part of an electrical power system. Services vary in scope from emergency troubleshooting to installation, maintenance & acceptance testing, commissioning, start-up, system studies & analysis, repairs & turn-key type solutions.

We are currently recruiting an experienced **Term Field Safety Representative** to work on a local industrial site. This individual would be reporting to Project Management and Corporate Safety.

Compensation Package

To be determined based on candidate.

Duties & Responsibilities

- Maintain a 75% presence in the field daily
- Refer to client's & JA Tech Safety's Safety Manual & site procedures to provide guidance to supervision
- Communicate with Project Management Team
- Support the completion of documentation, daily reports & statistical tracking
- Facilitate incident investigations & support the OHC
- Facilitate safety meetings as required
- Provide visible leadership & commitment to health & safety in the field
- other duties as required

Skills & Qualifications

- valid National Construction Safety Officer Designation**
- minimum 5 years' experience in the safety field as a NCSO
- Be knowledgeable of Saskatchewan OH&S Legislation
- Electrical experience in industrial setting
- Strong communication & organizational skills
- Proficient in using Microsoft Office
- Ability to analyze information & strong attention to detail
- Willingness to follow established procedures
- Demonstrated ability to handle multiple tasks, set priorities & meet deadlines without supervision
- Self motivates with a pro-active attitude
- Valid driver's license

candidates must be legally entitled to work in Canada

How to Apply

Please submit your resume in strict confidence to: careers@jatechpowersystems.com. We thank all applicants; however, only those selected for an interview will be contacted.
