

Are you looking for a chance to grow & develop as an Electrical Engineering Technologist or a new, exciting opportunity? We are currently recruiting for up & coming Electrical Engineering Technologists (EET), who are driven, want to grow their skill set & be a part of a dynamic team. We are invested in growing our employees through Professional Development & mentoring. At JA Tech, we recognize that that our teams are strengthened through inclusion & diversity. We are driven to find the right candidate & are willing to provide a signing bonus to right candidate!

We provide our employees with a benefit package that is unique to industry & shows our investment in our employees' wellbeing!

- Enrolment in the following 100% Company Funded programs, after 90 days:
 - Life/Dependent/AD&D Insurance, Short- & Long-Term Disability
 - myFlex Plan
 - EAP
 - DPSP
 - Wellness Days
- Highly competitive wage
- Staff functions, rewarding volunteer opportunities

What can you bring to us?

- A diploma from a recognized Electrical Engineering Technology program.
- 3-5 years of field experience
- Experience with drafting
- Experience with testing equipment (Omicron, Doble, etc.) & relay testing with various equipment (SEL, GE, Siemens, ABB, etc.)
- Experience in substations
- Ability to understand & perform technically complex calculations
- Strong knowledge of drawings (wiring, schematic, & layout)
- Valid Driver's Licence
- Able to travel & remain at project sites as required
- Must be legally entitled to work in Canada

You will get the opportunity to work in a variety of locations with a diverse & well-rounded team! Typical responsibilities would include:

- Performing maintenance, testing, troubleshooting, & repair of low, medium & high voltage equipment in a safe & efficient manner
- Commissioning & start-up of low, medium, & high voltage equipment & apparatus associated with an electrical power system
- Acting as liaison with subcontractors & clients, develop customer service relationships
- Supervising/leading projects to ensure successful project execution according to company & client standards
- Providing mentorship to junior technologists & support to team members
- Completing & submitting technical reports & test sheets

JOB POSTING

If all this sounds like you belong working with us, we want to hear from you! Please submit your resume in strict confidence to: careers@jatechpowersystems.com. We thank all applicants; however, only those selected for an interview will be contacted.
